

Absorbent Solution

For Oil, Chemical & Other Liquid Spill Response

High Absorbency
Rapidly absorbs oil, chemicals, and a wide range of liquids for fast and effective spill control.

Reliable Protection
Helps maintain a safer, cleaner workplace while supporting compliance with workplace safety standards.

Easy to Use
A practical solution for fast and efficient spill response across a wide range of industrial environments.

Absorbent Pad

Universal Pad

Chemical Pad

Absorbent Pad quickly absorbs oil, chemicals, water, and other liquids. Ideal for routine maintenance and emergency spill response.

Oil Only Pad: Absorbs oil without absorbing water. Floats on water, making it ideal for spills in marine environments.

Chemical Pad: Designed to absorb hazardous chemicals.

Universal Pad: Suitable for absorbing oil, water, and most industrial liquids.

Also available in **Roll** form for larger spill coverage.

*Absorbent Pad

Size	Weight	Packing	Absorbency
40 cm x 50 cm	40 gr / pcs	200 pcs / bale	Around 90 litres/bale (oil) 80 litres/bale (water)
40 cm x 50 cm	80 gr / pcs	100 pcs / bale	Around 90 litres/bale (oil) 80 litres/bale (water)

*Absorbent Roll

Size	Weight	Absorbency
0,5 m x 50 m	5 kg / roll	Around 56 litres/roll (oil) 50 litres/roll (water)
1 m x 50 m	10 kg / roll	Around 112 litres/roll (oil) 100 litres/roll (water)

Absorbent Pillow

Universal Pillow

Chemical Pillow

Absorbent Pillow are designed to absorb large-volume spills. Ideal for use under leaking equipment, tanks, or other drip points where pads are less effective.

Oil Only Pillow: Absorbs oil while repelling water. Perfect for land and marine oil spills.

Chemical Pillow: Offers reliable absorption for hazardous chemicals.

Universal Pillow: Suitable for most industrial liquids, including oil and water based fluids.

Size	Weight	Packing	Absorbency
20 cm x 25 cm	170 gr / pcs	32 pcs / bale	Around 37 litres/bale (oil) 21 litres/bale (water)
40 cm x 50 cm	410 gr / pcs	16 pcs / bale	Around 46 litres/bale (oil) 26 litres/bale (water)

Absorbent Sock

Universal Sock

Chemical Sock

Absorbent Sock creates a barrier to contain spills and stop liquids from spreading. Commonly used to protect work areas, machinery, and drains.

Oil Only Sock: Targets oil while repelling water. Well suited for both indoor applications and water surfaces.

Chemical Sock: Effectively contains chemical liquids.

Universal Sock: A practical option for everyday spill control involving oil, water, and other industrial fluids.

Size	Weight	Packing	Absorbency
d 7,6 cm x 1,2 m	650 gr / pcs	12 pcs / bale	Around 54 litres/bale (oil) 31 litres/bale (water)
d 7,6 cm x 3 m	1500 gr / pcs	5 pcs / bale	Around 52 litres/bale (oil) 30 litres/bale (water)

Marine Boom

Oil Marine Boom The Oil Marine Boom is an effective floating barrier for surrounding and controlling oil spills on water.

Performance: Selectively retains oil while allowing water to pass, supporting faster and more efficient recovery.

Applications: Widely used in harbors, offshore operations, rivers, lakes, and coastal spill response.

Size	Weight	Packaging	Absorbency
d12,5cm x 3m	2500 gram/pcs	4 pcs / bale	Around 70 litres/bale
d 20cm x 3m	6400 gram/pcs	4pcs / bale	Around 179 litres/bale

Smartwipes

Smartwipes are durable industrial wiping materials designed for effective cleaning and surface wiping in demanding work environments. They are lint-free, ensuring clean and reliable performance without leaving fibers behind.

Performance: High absorbency for oil and a wide range of liquids. Maintains excellent strength in both dry and wet conditions. Resistant to solvents and various industrial chemicals.

Applications: Ideal for cleaning equipment, machinery, tools, and work areas, helping maintain a cleaner, safer, and more efficient workplace.

Size	Weight	Absorbency
30 cm x 108 m (perforated every 36 cm)	2.3 kg / roll	Around 16 litres/roll (oil) 9 litres/roll (water)
