

FloodLock is a modern and practical flood protection solution. An innovative water-retaining barrier that absorbs water and automatically expands to form a protective shield. Designed to replace traditional sandbags, FloodLock offers a smarter, cleaner, and faster solution for emergency situations.

USER INSTRUCTIONS

1

Soak in Water

Soak the FloodLock bag in water until it is fully saturated and expanded.

2

Flatten the Gel

Make sure the gel is spread evenly inside the FloodLock bag to form a solid barrier.

3

Place in Required Area

Stack the absorbents as illustrated for optimal performance.

IMPORTANT NOTICE

- Keep out of reach of children and pets.
- Avoid contact with sharp objects to prevent product damage.
- Do not open the packaging before use.
- Use in accordance with the instructions for optimal results.
- Do not use salt water.

AFTER USE

-  Dry under direct sunlight.
-  Dispose of as plastic waste.
-  Do not dispose of in drains or sewers.
